The holder of this License shall be permitted to practice limited live-capture of Finches subject to the following conditions:

1. The period for the live-capturing of Linnet, Goldfinch, Greenfinch, Siskin, Hawfinch, Chaffinch and Serin for the year 2014, hereinafter referred to as "the Autumn live-capturing season", shall be on the following dates:
 - (a) between the 20th October 2014 and the 31st December 2014, both dates included.

3. No live-capturing shall be allowed within the boundaries of Bird Sanctuaries, Protected Beaches and Protected Areas as defined in Subsidiary Legislation 504.71⁷ and published on <http://www.mepa.org.mt/mepa-mapserver> (*Restricted Trapping Zones*). Cultivated agricultural land located within the boundaries of Protected Areas and officially registered with the Department of Agriculture prior to end of July 2014 are exempted from this restriction. This exemption does not apply to sites located within Bird Sanctuaries or Protected Beaches where hunting and live-capturing is prohibited.
4. No live-capturing can take place on any site that has either not been registered with the Commissioner of Police prior to the end of December 2012, or that is not identifiable as a live-capturing site on aerial photographs published prior to end of December 2012.

metres per each net:

Provided that if the licensee is in possession of both the special live-capturing license for Finches and the special live-capturing license for Golden Plover and Song Thrush, such licensee may use nets with a mesh size of not less than 18mm for the live-capture of all species allowed under the terms of both licenses, provided that the largest size of each such net shall not in any case exceed 38 square metres. Provided further that if such licensee is in possession of both Special Licenses and provided that one of the live-capturing stations is used by such licensee exclusively for the purpose of live-capturing Golden Plover and/or Song Thrush and not for the purpose of live-capturing of Finches, such licensee may use on this live-capturing station nets with a mesh size of not less than 30 mm, and the largest net size shall not exceed 60 square metres.

7. The holder of this License can only operate one live-capturing station (not more than two pairs of clap-nets) at any one time.
8. This License permits only the use of traditional manually-operated selective clap-nets which consist of two parallel nets spread flat on the ground which capture birds by clapping over each other on the ground, and which are armed and operated solely by human intervention without the use of any external power means including electrical, electronic, or mechanical means.
9. The clap-nets shall be disarmed and laid completely flat on the ground at all times during prohibited hours, and dismantled upon closure of the live-capturing season and removed from the site. When the nets are disarmed and laid completely flat on the ground, the licensee shall take requisite measures to ensure that no accidental entanglement of any species occurs when the nets are not active.
10. The overall seasonal bag limit for the 2014 Autumn live-capturing season is 12,000 for Linnet, 800 for Goldfinch, 4,500 for Greenfinch, 2,350 for Siskin, 500 for Hawfinch, 5,000 for Chaffinch and 2,350 for Serin as the total number of birds which may be captured under the authority of all issued licenses taken together.
11. The 2014 Autumn live-capturing season's bag limit allowed under this License is ten (10) birds per licensee or however many below this number might have been captured before the season is closed. 12. The Licensee shall not, at any time, hold nor have in his possession more than a total of ten (21) finches/hybrids used as live-decoys whilst at the capturing site, irrespective of the number of licensed live-capturers registered on the same live-capturing station. However, the maximum number of live-decoys from each species/hybrid cannot exceed seven birds. This means that a live-capturer can have either up to three live-decoys from all the seven finch species/hybrids at any one time, or up to seven live-decoys from three species/hybrids only, or any combination as long as the total limit of 21 is not exceeded, of which not more than 7 can be from the same species/hybrids. This limit shall also not be exceeded when the license holder is travelling to or from the capturing site.
13. In accordance with Regulation 7(k) of S.L. 504.124, in order for a bird to be considered as a live decoy, it shall bear a seamless closed ring, or a single-use ring which is approved and provided by the Wild Birds Regulation Unit and which has been supplied with this License. The **green** single-use ring referred to above shall only be deemed as approved by WBRU if it is placed on the **Greenfinch's** tarsus. The **orange** single-use ring referred to above shall only be deemed as approved by WBRU if it is placed on the **Hawfinch's** tarsus.

14.
